

NATURAL GAS SECTOR ALLIANCE: PATH TOWARDS CARBON NEUTRALITY

This alliance seeks to consolidate and strengthen the implementation of actions and good practices within the companies affiliated with Naturgas to contribute to the country's commitments to carbon neutrality.

OUR BET

Articulate the initiatives of companies aimed at contributing to the country's commitments to carbon neutrality.

Build and consolidate goals for reducing and compensating Greenhouse Gas (GHG) emissions by 2030 and 2050.

Establish a roadmap to execute actions that contribute to the goal of carbon neutrality.

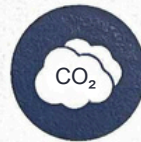

ACTIONS

Reduce fugitive emissions, venting and gas flaring in torches, among others.

Develop compensation projects such as tree planting, forest restoration and REDD+ projects

Participate in voluntary carbon markets.

Implement hydrogen projects.

Implement carbon capture, use and storage technologies.

Implement projects for the rational and efficient use of energy.

Implement circular economy projects.

Define tools and alternatives that allow cooperation and interaction between companies.

PRINCIPLES

Voluntarily:

- Participation, goals and commitments will be defined by each company.

Traceable:

- Medium and long-term goals and commitments will be quantified and evaluated annually.

Cooperative:

- Through the Alliance, good practices will be shared on developments that contribute to the reduction and compensation of GHG emissions.
